

06 — FINAL INTEGRATION CHECKLIST

Use after Teams 1, 2 and 3 are ready

Required Inputs

- ☐ Team 1 final AI/ML code + handoff
- ☐ Team 2 backend + database + final API spec
- ☐ Team 3 frontend
- ☐ API_CONTRACT.md
- ☐ Shared repository
- ☐ Demo dataset

End-to-End Audit

- ☐ Upload works
- ☐ Backend validates input
- ☐ Team 1 pipeline executes
- ☐ ML results are persisted
- ☐ Alerts are returned by API
- ☐ Dashboard loads real API data
- ☐ Entity investigation works
- ☐ Graph data renders
- ☐ Risk/explanation/evidence match Team 1 output
- ☐ Export/report works
- ☐ No field-name/type mismatches
- ☐ Environment variables work
- ☐ CORS/auth works if applicable
- ☐ Complete offline demo works
- ☐ Final end-to-end test passes

Integration Instruction

First audit all three codebases and contracts. Identify conflicts before rewriting. Preserve working Team 1 detection logic and make the minimum changes required for compatibility.
